

Plus Size Lingerie Big Is Most Definitely Beautiful

Finding sexy plus-size lingerie might seem like a difficult endeavour, but with new advances in the industry and more demands on retailers, the days of uncomfortable and garish lingerie for the bigger woman are all but gone for good. Now, larger women can look sexy and seductive with plus-size lingerie.

Nothing is more discouraging than searching through dozens of stores and online shops for a great little number. It's tough to fit into a medium/small world when you're a large or larger. You want the same sexy corsets and bustiers or slinky silk gowns and playful babydolls the "little" girls are wearing. Even if you order the largest size of lingerie available, if it isn't made for your type of body, it's going to be uncomfortable and most likely won't fit well at all.

Stop suffering through these countless disappointments. Designers are turning their attention to the plus-size lingerie market and there is a better selection available for big women. After all, big women are sexy, too!

Here are some shopping tips for sexy plus size lingerie that fits:

First, determine your proper size. You might need to visit a lingerie store to speak with the saleswomen. Be honest with yourself about your size, too. You might think you're a size 14, but you're really more of a 16 or 18 - and that's okay!

Have the salesperson take measurements, even if the only piece of lingerie you're looking for is a bra. Most women don't know their proper bra or panty size. The right measurements make all the difference in the world.

Remember that sizes vary slightly from manufacturer to manufacturer. Some sizes run small, other run a little larger. Your salesperson needs to be honest, too. Make sure she isn't telling you an article of clothing looks great just to make a sale.

An experienced salesperson will help you determine and discover your best qualities. Draw attention to those with sexy plus size lingerie. A baby doll ensemble covers the hips and accentuates the legs. A corset or bustier is fantastic for a woman with a beautiful bosom while flattering the curves of the waist and hips. A sheer bed jacket over a silky camisole covers arms and shoulders but reveals just enough to tempt your partner.

Plus-size women no longer have to settle for the leftovers. Many stores are cropping up that specialize in creating seductive lingerie for all sorts of women. The opportunities are endless to look sexy and sleek, regardless of size. With plus-size lingerie, slinky and spicy options are available to help inject the passion back into the bedroom.
