

Shopping for Plus Size Wedding Gowns: How to Find the Best for That Special Day

A wedding gown is probably one of the most important purchases a woman makes in her lifetime. This is an entire line in the women's fashion segment and designers have succeeded in creating fabulous designs to match every taste. In the past, the gowns were designed with a slender figure in mind with the accents and styles made to flatter only the small- and medium-built women. But through the years designers have become aware of the growing market for heavy-set women. Plus size wedding gowns are now part of the regular offerings of fashion houses worldwide.

The entire wedding ensemble for the bride begins with the bridal lingerie. It is recommended that brides have separate lingerie to match their wedding gowns and to wear for their honeymoon. For plus size wedding gowns, it is best to focus on the functionality of the bridal lingerie. Department stores that offer plus-sized clothing should also have a selection of undergarments. The bridal lingerie should depend on the style of the wedding gown. One should look for undergarments that lend a good silhouette while being comfortable enough to wear for long hours.

For selecting and purchasing wedding gowns, plus size brides can coordinate with their local bridal salons. These salons usually have a wide stock of gowns and they have information on the best sources of plus size gowns. The Internet can also provide tips on where to buy wedding gowns and on how to select the perfect plus size gown. Fashion designers now have online stores that offer a wider range of items to choose from. Many designers actually have plus size models wearing the gowns to give shoppers an idea on how a certain style or design would look on a particular body type.

After gathering information on where to acquire bigger size wedding gowns, heavy-set women should then focus on selecting one that hides the flaws of her figure while emphasizing her good points. Sleeveless, strapless or haltered gowns would not suit plus size women who usually have large upper arms. They should wear cap sleeves or opt for a lacy jacket with longer sleeves to wear over the gown. Larger arms can also be camouflaged with short lacy sleeves. Puffy sleeves may be an option, but they should not bind the arms.

Walking down the aisle in a stunning wedding ensemble is every marrying woman's dream. Size must never be a hindrance to looking your best in this momentous occasion. For full-figured women, plus size wedding gowns are now more readily available and their wedding days can no longer be ruined by a hopeless search for an appropriate wedding dress.
