

## Plus Size Fashion Tops

All women are beautiful, and any woman who knows a few tricks can let that beauty shine through to look her best. Of course, this applies to plus size women, too! Like Oprah and Delta Burke have proven, beauty has absolutely nothing to do with dress size.

Plus size fashion tops have come a long way from the frumpy, tent-shape garments of just a few short years ago. Designers are now creating beautiful plus size fashion tops in a variety of styles, fabrics and colors. For less than the cost of dinner at a fine dining establishment, the proper plus size fashion top can turn a plain outfit into a "wow" outfit. Fashion tops are the perfect solution to hiding problem areas or accentuating areas such as the bust or neck. The following fashion guideline can help you determine which plus size fashion top is best for you.

The first rule of thumb when selecting plus size fashion tops is to think vertical, not horizontal. Vertical stripes and bold buttons down the front of a plus size fashion top is a way of "thinking vertical". Vertical stripes draw the eye up and down, not side to side and can give you a thinner appearance.

Choose the right size fashion top to fit your body. The goal is to find fashion tops that hug your body and enhance your curves. Avoid fashion tops that fit too tightly as they emphasize problem areas and will make you feel self-conscious. At the same time, you don't want your fashion tops to be too baggy either. Just because you're plus size, doesn't mean you have to hide your body. Choosing the proper fitting plus size fashion top will allow you to show off your beautiful curves in a classy and chic manner.

Stick to classic designs and clean cuts when choosing your plus size fashion tops. These types of fashion tops help define a full figured body and work best for our curves. Don't be afraid of color! This fall offers a dazzling display of color in plus size fashion tops. While black may be slimming, color can add pizzazz! Select colors in shades that are flattering to your skin tone and body type.

You are allowed to show a little skin, and a low cut fashionable V-neck top can emphasize your bust while highlighting your face and elongating your neck. However, a bare midriff should not be showing unless your middle is very firm. Busy prints tend to make plus sized women appear bigger, so avoid them. The same applies for animal print tops, although scarves with animal prints can be a fine accessory to a fashionable outfit.

For an updated, pulled-together look, accessorize with trendy shoes, scarves, and handbags. Pins and brooches are an easy way

to add a dramatic touch of glamour and sparkle to any jacket or top. The most versatile, affordable way to create countless different looks with your suits, jackets, and slacks are plus size fashion tops. All you have to do is choose the right size, style, and color, and you'll be feeling&quot;&quot;and looking&quot;&quot;great all season long!
